Your Benefits

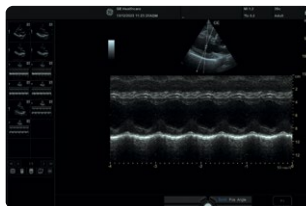

✓ TVI

Evaluate heart function through myocardial motion data: Myocardial Doppler Imaging with color overlay on tissue image to assess left ventricular relaxation abnormalities

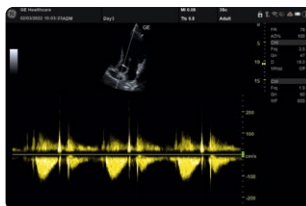

✓ AMM

Manipulate the cursor at different angles and positions, allowing it to be placed perpendicular to a structure of interest

✓ CWD

Optimize PW/CW spectrum at the touch of a button: Auto-adjust the Velocity Scale/PRF (live imaging only), baseline shift, and invert (if preset)

✓ Stress Echo

Enhance your confidence when evaluating vessel patency: visualize complex hemodynamics and highlight moving blood and tissue

✓ Auto EF

Evaluate heart function through semi-automatic measurement of left ventricular volume change with the Automated Ejection Fraction (Auto EF)

Service

Individual solutions

Not a match? Let's find the right solution for your individual needs – à la carte. A special service from us to you.

Guaranteed long-term satisfaction

- Multi-year warranty
- Probe Check
- Software e-Delivery

Versana Club

Versana Club offers resources to help you build your skills, network with others and share your ultrasound knowledge.
