

Overhead suspended centre mount shield model 354

- 0.5mm lead acrylic with ball & socket joint can be positioned at any angle
- Shield can be placed over the patient for maximum protection
- The decision to locate the cut-out on the left or right can be made during installation according to its intended use
- A version without the cut-out can be rotated horizontally if a wider shield is required
- Optional flexible 0.5mm Pb curtains can be factory fitted to either version
- Other sizes available
